- Unity Gaming
- Operating Systems
- Data Structures & Algorithms
- Database Management System (DBMS)

PROJECTS

Weather App [🔗](#) | [React.js](#)

2023

- Developed a responsive weather app using **React** and **OpenWeatherMap API**.
- Implemented **Geolocation** and **Search Functionality** for user convenience.
- Utilized **React Hooks** and **Error handling** for efficient data fetching and informative error messages.

Calculator App [🔗](#) | [React.js](#)

2023

- Developed a calculator app using **React** and **CSS Grid** for responsive layout.
- Implemented basic arithmetic operations such as **addition, subtraction, multiplication, and division**.
- Utilized **React Hooks** to manage state and update display on user input.

Password Generator [🔗](#) | [React.js](#)

2024

- Created password generator with custom options: **length, case, numbers, special characters**.
- Added **React Toastify** for user feedback: password generation, clipboard copying.
- Configured project with **dependencies** for seamless development and testing.

Cartcrave [🔗](#) | [React.js](#)

2024

- Created e-commerce platform with **React.js**, showcasing frontend skills.
- Utilized **Redux Toolkit** for efficient state management, ensuring smooth data flow and scalability.
- Implemented responsive design with **Bootstrap** and **React-Bootstrap** for user experience across devices.
